II CAREEER OBJECTIVE

Seeking the role of Full Stack Web Developer to leverage my extensive experience and passion for crafting engaging digital experiences. I bring a deep understanding of Object-Oriented JavaScript, contemporary JavaScript libraries, Express, CSS & SCSS, semantic HTML, Node.js, ES6, and responsive design principles. Visit my portfolio at www.Jordanvera.com to see examples of my work and the innovative projects I've led.

II EXPERIENCES

Full Stack Developer

Digital Publishing Inc. (2023-current)

As a dedicated full-time Full-Stack Developer at DPI, I played a pivotal role in the successful deployment of several platforms and web apps. My responsibilities included working closely with the team to meet essential project deadlines and focusing on the development and enhancement of features that met the specific needs of our end users.

Refactored Book Reader Application

- Successfully refactored the book reader application from Create React App to Next.js, significantly enhancing performance metrics such as load times, interactivity, and SEO. Utilized React, Next.js, and Tailwind CSS to modernize the user interface and improve user experience across various benchmarks.

Spearheaded the 'Here's America' Platform Development

- Led the development of 'Here's America,' a novel online reading platform targeting young children, featuring original content. Leveraging Next.js, Prisma for backend services, and implemented comprehensive RESTful API services to enrich user interactions and content accessibility.to modernize the user interface and improve user experience across various benchmarks.

Developed Dynamic RESTful API Services

- Engineered RESTful API services using Node.js and Express, designed to respond to dynamically chosen user inputs, enhancing the interactivity and responsiveness of JavaScript front-ends across multiple projects. Ensured scalability and security in API communication.various benchmarks.

Implemented Comprehensive Testing

- Introduced and implemented a rigorous testing framework incorporating both end-to-end and unit testing using Jest and React Testing Library. This initiative significantly reduced the number of bugs reported

Javascript Developer

Frontier Services Group (2019-2022)

I successfully improved existing websites, optimizing their performance and user experience. Additionally, I took the initiative to design and build an internal dashboard using technologies such as React, Chart.js, and Express.

- Implemented internal dashboard using react and chart.js that gave visualizations on recent and annual sales data, equipment measurements, and more.

- Redesigned and built out a myriad of internal and external customer facing websites along many different marketing strategies.
